CAREER OBJECTIVE

Enthusiastic and detail-oriented Computer Science student with a strong foundation in Python and Full stack development. Eager to contribute to real-world software projects through an internship or entry-level role while continuing to learn and grow in a collaborative environment.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. CSE	Chaitanya Deemed to be University	9.7	2022-26
Senior Secondary	TSBIE Board	97.7%	2020-22
Secondary	SSC Board	10.0	2020

EXPERIENCE

Python Developer, Infosys Springboard

Sep 2025 - Dec 2025

AirAware Smart Air Quality Prediction

- Built an ensemble time series forecasting model (combining multiple algorithms) trained on 2+ years of historical data to predict AQI and pollutant levels, enabling proactive environmental decision-making for urban planners.

Frontend Developer, Apex Planet

June 2025 - July 2025

Food Order Website

- Developed a fully responsive food ordering web interface using HTML, CSS, and JavaScript, supporting dynamic menus across 15+ items with real-time cart updates and zero page reloads.

PROJECTS

ESPER – Smart Policy Estimation & Risk Assessment

Jan. 2026 – Apr. 2026

Python, Flask, YOLOv8, MySQL

GitHub

- Engineered YOLOv8 pipeline for vehicle damage detection achieving 94% classification accuracy on insurance claims.
- Designed rule-based severity assessment model with 85–90% accuracy, generating explainable and auditable risk scores.
- Built multi-layer fraud detection using image forensics, vehicle consistency checks, and text-image validation.
- Developed Flask + MySQL backend enabling end-to-end claim processing in under 5 seconds across 40+ test cases.

Vocal Bid – Voice-Enabled Real-Time Auction Platform

Aug. 2025 – Nov. 2025

React.js, Node.js, Socket.io

GitHub

- Built voice-enabled auction platform using Web Speech API, enabling hands-free bidding with real-time updates.
- Architected Socket.io sync system designed for 1,000+ concurrent connections with low-latency state updates.
- Secured user sessions using JWT + bcrypt, ensuring encrypted authentication and data integrity.
- Delivered full-stack app with React frontend and Node.js backend with modular architecture for future scaling.

TECHNICAL SKILLS

- Programming:** C, Python
- Web Development:** HTML, CSS, JavaScript, Reactjs
- Databases:** SQL, RDBMS
- Version Control:** Git
- CS Subjects:** OOPs, Data Structures and Algorithm, Operating System

POSITIONS OF RESPONSIBILITY

- Organizer,** Technovista Event, CDU

Jul. 2024 - Aug. 2024
